BPO operations leader turned Power Platform solution architect with 9+ years of experience spanning customer service, ads review, and content moderation delivery at global scale. Built and led teams of up to 34 members using self-developed Power Platform tools — Power Apps dashboards, Power Automate workflows, and Power BI analytics — to drive 98% SLA compliance, 80% task automation, and 25% reduction in average handling time. Now delivering enterprise-grade Power Platform solutions: 16 production systems, 365+ apps migrated, and AI-powered development pipelines that cut delivery time by 70%.

📦 365+ Apps Migrated

🚀 16 Production Systems

⚡ 80% Task Automation

🎯 98% SLA Compliance

👥 Teams Led: 9 → 34

🤖 50+ AI Agents Deployed

Professional Experience

Power Platform Solution Manager

Jul 2025 – Present

Meraki Malaysia — Contract / Freelance

Leading enterprise Power Platform architecture, automation strategy, and digital transformation initiatives. Designing scalable Canvas App and Power Automate solutions integrated with SharePoint Online and Dataverse.

- Architecting enterprise-scale Power Platform solutions for cross-departmental digital transformation
- Establishing governance frameworks for Power Apps ALM, environment strategy, and security compliance
- Driving adoption of AI-assisted development methodologies across solution delivery teams

Power Platform Solution Architect & Systems Developer

IOI Group — Freelance Contract (concurrent with Concentrix full-time role, delivered nights/weekends)

2024 – 2026

Led enterprise-wide legacy system-to-Microsoft 365 migration — modernizing 365+ business applications across 28+ departments. Designed dual-track architecture (React 19 TypeScript code-first + 16 Canvas Apps), built 50+ AI agents across 12 automated development pipelines, and established enterprise governance standards (WCAG 2.2 AA, OWASP Top 10, Core Web Vitals).

- Delivered 16 production Power Apps with 7,878 Canvas screens and 400+ TypeScript components
- Built E-Procurement system with real-time bidirectional ERP synchronization
- Created AI-enabled development ecosystem — 50+ agents reducing migration effort by 70%
- Established enterprise governance with 200+ documentation files and 12 CI quality gates

Team Leader, BPO Operations — Customer Service, Ads Review & Content Moderation

May 2023 – Apr 2025

Concentrix

Led multi-line BPO operations across customer service, digital ads review, and content moderation workflows for a global technology client. Managed a team of 34 agents using custom-built Power Platform solutions — replacing manual spreadsheets and email-based tracking with real-time dashboards, automated workflows, and intelligent case routing.

- Scaled team from 9 to 34 members while maintaining 98%+ SLA compliance across all lines of business; reduced average handling time by 25%
- Built SmartFlow on Power Platform — automated business request intake and intelligent routing replacing manual triage, cutting manual tasks by 80% and achieving 90% data-tracking accuracy
- Deployed PulseTrack — real-time agent productivity dashboard (Power Apps + Power BI) eliminating 90% of manual reporting and freeing 60–80% of team-lead administrative workload
- Developed CS Resolver — AI-powered case classification tool using AI Builder that boosted categorization accuracy by 50% and accelerated resolution by 65% across 120+ SOP categories
- Led DocFinder — AI document search solution achieving 80% faster knowledge retrieval and 99% recommendation accuracy for frontline agents

Service Delivery Ops — Senior Team Lead | Team Lead | Data Analyst

Aug 2017 – Nov 2022 (5 years 4 months)

Accenture

Progressed through three roles in BPO service delivery for a global enterprise account supporting content moderation and customer support operations. As Senior Team Lead, managed 20–25 agents with 90%+ SLA compliance and used Power Platform to build real-time performance dashboards and automated KPI tracking — eliminating manual spreadsheet reporting.

- Led 20–25-member team sustaining 90%+ SLA; implemented data-driven performance insights that delivered a 15% increase in operational efficiency
- Pioneered Power Platform adoption on the operations floor — built SharePoint-backed tracking tools, Power Automate workflows for escalations, and Power BI dashboards for weekly business reviews, replacing manual Excel-based reporting
- Designed training and coaching programs supported by real-time performance monitoring tools built on Power Apps
- As Team Lead, analyzed team performance data, drove productivity strategies, and led Weekly Business Reviews with action plans for underperforming metrics
- Started as Data Analyst producing comprehensive performance reports; earned two promotions within 5 years based on operational excellence and automation impact

Career Break — Relocation & Upskilling

Nov 2022 – May 2023

Penang, Malaysia

Relocated from Kuala Lumpur to Penang. Used the transition period to deepen Power Platform expertise — completed Microsoft certifications, built personal automation projects, and prepared for the next career phase combining operations leadership with technical development.

Digital Marketing Specialist

Feb 2017 – Aug 2017

TheLorry

Started professional career in digital marketing after university graduation. Gained foundational experience in digital strategy, analytics, and cross-functional team collaboration.

Key Projects

IOI Domino → Microsoft 365 Migration

70% Faster Delivery

Enterprise-wide migration of 365+ legacy business applications to Power Platform. Dual-track architecture: React 19 TypeScript app + 16 Canvas Apps with SharePoint Online. 50+ AI agents across 12 automated pipelines.

- Power Apps
- Power Automate
- React 19
- TypeScript
- SharePoint
- GitHub Copilot
- GitHub Actions
- Azure Pipelines

E-Procurement System & Oracle PowerBiz ERP Integration

100% ERP Sync Rate

End-to-end purchasing suite — Purchase Requisition with LOA routing, Purchase Orders with multi-vendor splits, CIP Capex Budget Control, and SPQQ Supplier Portal. Bidirectional ERP sync via Custom Connectors and REST APIs.

- Canvas Apps
- Dataverse
- Power Automate
- Oracle ERP
- Custom Connectors
- REST APIs

AI-Enabled Development Pipeline

70% Effort Reduction

Built 50+ specialized AI agents organized into 12 automated workflow pipelines — form migration, TSX development, Canvas migration, QA, and governance. Reduced migration delivery time by 70%.

- GitHub Copilot
- Python
- TypeScript
- PowerShell
- Azure OpenAI

SmartFlow — Business Request Automation

80% Manual Task Reduction

Automated business request processing across Microsoft Forms, Power Automate, SharePoint, Power BI, and Teams. Replaced manual triage with intelligent routing — 80% manual task reduction, 90% data accuracy.

- Power Apps
- Microsoft Forms
- Power Automate
- SharePoint
- Power BI
- Teams

PulseTrack — Workforce Management

90% Reporting Reduction

Real-time agent status tracking dashboard eliminating manual reporting by 90%, increasing accuracy to 98%, and reducing team leader workload by 60–80% through automated aggregation and Power BI dashboards.

- Power Apps
- Power Automate
- SharePoint
- Power BI
- Teams

CS Resolver — AI-Powered Customer Service

65% Faster Resolution

AI-powered case classification using AI Builder for automated SOP categorization. 50% classification accuracy boost, 65% faster handling time, 120+ SOP categories automated.

- Canvas Apps
- AI Builder
- Power Automate
- SharePoint

Rebate Approval System — Isolated Compliance

100% Audit Compliance

Standalone corporate approval workflow with complete database isolation for financial audit compliance. 5-tier multi-level approval matrix with immutable audit trails.

- Power Apps
- Dataverse
- Power Automate
- SharePoint

Technical Skills

Power Platform

Power Apps Canvas, Power Automate, Power Fx, Power Pages, Dataverse, AI Builder, PA YAML v3.0

Languages & Frontend

TypeScript, React 19, Vite, shadcn/ui, JavaScript, HTML/CSS, Python, C#, SQL

AI & Automation

GitHub Copilot, AI Agents, Pipeline Automation, Python, PowerShell

Operations & BPO
